# THE BASICS OF DELIGHTFUL BATHING

There is nothing more relaxing than a long soak in the bathtub, especially a tub filled with rich bubble bath. Add some candlelight and soft music, and the problems of the day seem to fade away.

Today's homeowner is looking for a bathing experience that exceeds the imagination. The Geberit Bath Waste and Overflow is the perfect finishing touch to any luxury tub. The following pages demonstrate how Geberit sets the tone with cable-controlled PushControl™, TurnControl™, and other models that provide elegance and comfort. Choose a better bath waste. Choose Geberit.

## Experience trouble-free performance and unsurpassed quality.

### THE NEW LOOK OF BATH WASTE AND OVERFLOW

Unlike other styles of bath drains, the critical working parts of the Geberit Bath Waste and Overflow are outside the waterway – away from the flow of wastewater – to prevent clogging.

Geberit cable-controlled Bath Waste and Overflows offer unsurpassed quality. All the visible parts are made from high-grade metals and plastics and available in a variety of finishes including ForeverShine™.\* They retain their elegant beauty even after years of daily use. The rugged cable is crafted from Teflon® coated stainless steel and protected by a durable plastic sleeve to deliver trouble-free service, time after time.

Founded almost 150 years ago, Geberit has earned a reputation for innovation and reliability. Discover those qualities for yourself every time you specify or install a Geberit Bath Waste and Overflow.

### A Simple Push

#### PUSHCONTROL EASILY OPENS AND CLOSES THE DRAIN

Geberit takes care of the details with our elegant, patented PushControl line of Bath Waste and Overflows. A simple push on the self-adjusting PushControl, which adapts easily to any bath thickness, effortlessly opens and closes the drain. Geberit PushControl is a thin, elegant drain design that earned the coveted iF Award (International Design Forum).

### A Dazzling Turn

#### TRADITIONAL TURNCONTROL HAS BECOME THE STANDARD IN THE INDUSTRY SINCE ITS INTRODUCTION.

With a simple one-eighth turn of the handle, the TurnControl drain easily opens and closes. The contoured handles, offered in a variety of finishes, are streamlined focal points that create a truly sharp accent in any bathroom.

### An Integrated System

#### CASCADING TUB FILLER AND DRAIN

A soft crystal flow of water fills the tub at 18 gallons per minute\*\* with virtually no splash. A faster fill for a broader range of baths... that's the big advantage of the Geberit Integrated Cascading Tub Filler. Unlike traditional cascading fillers, ours is integrated with the bath waste and overflow. A sleek, thin design combines with our proven Geberit cable controls to provide you an integrated system that's as effective and trouble free as it is attractive.

\* ForeverShine™ finishes ensure the quality and look of your Geberit Bath Waste and Overflow will last a lifetime. Geberit offers a limited lifetime warranty on ForeverShine™ products installed in residential applications.

\*\* When connected to a minimum 3/4" water supply.

**www.geberit.us**

Geberit North America is part of the Geberit Group, a European market leader and global provider of sanitary technology. Located in Des Plaines, Illinois, Geberit North America provides concealed tank and carrier systems for wall-hung and floor-mounted toilets and fixtures. Geberit systems improve the look of any bathroom by hiding the unsightly toilet tank. Replacing a standard tank and toilet with the Geberit system results in more usable space, improved hygiene and better accessibility. The unique dual-flush valve saves water and is practically maintenance free. Geberit also offers cable-controlled bath waste and overflows in a variety of designer finishes. Critical working parts are outside the waterway, ensuring years of trouble-free operation.
