

ENHANCING STYLE AND COMFORT

ACCESSIBLE DESIGN

DESIGN
MEETS
FUNCTION

DESIGN FOR ALL

Whether the toilet compartment is intended for ambulatory or wheelchair occupants, home or public spaces, specifying a Geberit in-wall tank and carrier system combined with a wall-hung toilet bowl is safer and more accessible. Geberit makes it easier for anyone to live a bit more independently.

Greater Mobility

Eliminating the tank on the toilet allows greater mobility in the compartment and reduces the potential for injury.

Illustration showing minimum floor space required for ADA compliant bathroom compartment (60"W x 52"D)¹.

Adjustable Height

¹ When used in conjunction with wall-mounted toilet fixtures, 56" is allowed reduced minimum distance per to ANSI A117.1, Section 604.9.2.1

Wall-Hung Convenience

CLEANING

Easy to clean the entire floor with a mop. No bending or kneeling.

SAVES SPACE

Takes up less space than a standard toilet for greater flexibility, safety, and comfort in the smallest spaces.

EASY TO MAINTAIN

The Geberit valve eliminates problematic chains and flappers that corrode and fail. Working parts are easily accessed through the stylish flush and cover plates.

The fill and flush valves and supply stop are located behind the wall. If maintenance is required, all working parts are easily accessed through the flush plate or cover plate.

Carrier Frame Basics

FLEXIBILITY IS STANDARD

The system fits in 2x4 or 2x6 walls. Adjustable height allows the Geberit system to easily accommodate the toilet seat height from 15 inches (380 mm) minimum to 19 inches (485 mm) to meet personal preference or local ADA guidelines including ANSI A117.1.

MAXIMUM SUPPORT

The rugged steel frame of the in-wall system is capable of supporting up to 880 pounds (400 kg), exceeding ASME A112.6.2 strength requirements.

Tank and Valves

INSULATED TANK

The impact-resistant high-density tank is guaranteed against leaks and insulated to prevent condensation.

WATER SAVING DUAL-FLUSH

Dual-flush volumes of 1.6/0.8 GPF (6/3 LPF) or 1.28/0.8 GPF (4.8/3 LPF) exceed high efficiency toilet standards. You can even qualify for EPA WaterSense rebates or green building points.

ADA INSTALLATION GUIDELINES

CONVENIENCE AND ACCESSIBILITY

Geberit Type 10 IR hands-free, touchless activation helps prevent the spread of germs, perfect for private or semi-public bathrooms where users are looking for the ultimate in comfort, convenience, and hygiene. Type 10 IR touchless buttons are easy to use: wave a hand near the sensor. Continue to hold hand in front and benefit from built-in user initiated dual-flush operation.

REMOTE CONVENIENCE

The pneumatic components of the Geberit Type 01 and Rectangle remote actuators have been tested for years of stress and require less than five (5) pounds of force to actuate the flush. Air pressure transmits force from the flush control to the flush valve. Geberit cover plates complement the remote flush, providing easy access to working parts of the system. The remote button is a convenient, easy to use option.

SMOOTH FLUSH MOUNT

The Geberit Omega 60 actuator plate mounts evenly with the wall surface for a sleek, safe minimalist appearance. Its streamlined design has no protruding edges, enhancing the feeling of spaciousness and safety in your bathroom.

WATER SAVING SINGLE FLUSH

Geberit has equipped the single flush Sigma10 flush plates with a stop-and-go flush function that lets the user interrupt the standard flush cycle: you decide precisely how much water you want to use (or save). Simply push to flush, and push again to stop. Not all jurisdictions accept dual-flush. Geberit offers this unique solution for those areas.

www.geberit.us

Geberit North America is part of the Geberit Group, a European market leader and global provider of sanitary technology. Located in Des Plaines, Illinois, Geberit North America provides concealed tank and carrier systems for wall-hung and floor-mounted toilets and fixtures. Geberit systems improve the look of any bathroom by hiding the unsightly toilet tank. Replacing a standard tank and toilet with the Geberit system results in more usable space, improved hygiene and better accessibility. The unique dual-flush valve saves water and is practically maintenance free. Geberit also offers cable-controlled bath waste and overflows in a variety of designer finishes. Critical working parts are outside the waterway, ensuring years of trouble-free operation.

For more information, contact your Geberit sales representative, call 847/803-5000 or go to www.geberit.us
